

WELCOME TO EXETER HOSPITAL EMERGENCY DEPARTMENT

Our goal is to provide you with the highest quality care as efficiently as possible. To meet that goal, Exeter Hospital is pleased to partner with US Acute Care Solutions (USACS), a team of board certified emergency medicine physicians who work with our specially trained physician assistants and nurses. USACS brings a wealth of experience in emergency department care and efficiency.

We understand that patients are often anxious during an Emergency Department (ED) visit. Please feel free to ask your health care providers any questions you may have about your condition or treatment.

What happens when I arrive?

You will first be assessed by our triage providers. Once assessed, you will either be discharged to go home or brought to a room in the main ED.

When will I go to a room?

Patients are assigned ED rooms based on the severity of their illness or injury. More critical patients are seen first, whether they walk in or arrive by ambulance. Triage helps to determine each patient's need.

What happens next?

In the ED room, you may have tests such as blood work or X-rays. You will then be treated by the physicians, physician assistants and nurses. Depending on your condition, you will be discharged or admitted to a room in the hospital for further testing or care.

Being discharged

When you are discharged, you will be given instructions for any follow up care that is needed. Be sure to ask any final questions you may have. It is important to follow up with your primary care provider as directed. If you don't have a primary care provider, please call our Information & Referral Center at 603-580-6668 and our staff will help you find a provider who meets your personal needs.

Your feedback is important.

Most patients will be sent a survey about your care after you return home. We take your feedback seriously, so please take a moment to fill out the survey. If you have a specific praise or concern, call our patient relations coordinator at 603-580-6913.
