

Amanda Blanchette, DPT

Physical Therapist

Amanda has been a Physical Therapist since 2010 working most of her career in adult rehab specializing in post-stroke recovery, amputee and prosthetics assessment, and balance retraining. She joined the Pediatric Rehab team in 2017 and has been focusing on continuing her passion of treating neurologic and gait/balance disorders in a younger population. Amanda builds her therapy practice around incorporating meaningful activities for each individual into her therapy sessions. When she is not in the clinic Amanda enjoys spending time near the ocean, playing soccer, and being on the board of a non-profit organization to support amputees.
