Oriental medicine treats both the mind and body as one. Acupuncture is a perfect fit with the mind/body connection.

Acupuncture is a wonderful compliment to the many services available with Core Physicians. Clients utilize acupuncture to balance their body's healing energy (Chi) which enhances their overall health and well-being.

Acupuncture is also effective in helping reduce pain and inflammation for patients who are participating in various rehabilitative services designed to improve function and overall fitness.

What you can expect from acupuncture:

The first visit is two hours long and includes an initial consultation, diagnosis and mild treatment. All follow-up visits are one hour long. For optimal results, weekly sessions are recommended.

The sessions are very relaxing and many patients fall asleep during their treatments.

Payment is expected at the time of treatment. Invoices are available upon request for clients who are eligible for insurance reimbursement.

Acupuncture has been proven to be an effective treatment for the following health conditions:

- Allergies/asthma
- Anxiety/stress/depression
- Arthritis/rheumatoid arthritis
- ADHD/difficulty concentrating
- Eczema/acne/shingles
- Fibromyalgia
- Headache/migraines
- High blood pressure/blood sugar
- Heartburn/acid reflux
- Insomnia/menopause/PMS
- Lower back pain/neck pain
- Nausea/vomiting/morning sickness
- Sprain/muscle strain and pain
- Stroke rehabilitation
- TMJ dysfunction/pain
